

Ready-to-Assemble (RTA) Kit

For those interested in the Do-It-Yourself option, the Ready-to-Assemble (RTA) Kit is for you! It is only available for our Traditional Storm windows. We provide all of the mortised and tenoned components of the storm fabricated from Northern White Pine. We ship the labeled parts to you for assembly; you purchase putty glaze and glass (or re-use existing). The benefits of this style of storm are decreased shipping expense and sweat equity—without having to purchase expensive equipment.

Adams Standard Profiles:

Top Rail Width: 2-1/8"

Stiles Width: 2-1/8"

Thickness: 1-1/8"

Bottom Rail Width: 3-1/2"

Center Bar Width: 1-1/4"

Ready-to-Assemble
(RTA) Kit
