

## Famous Building on University Campus Gets a Facelift

### Van Vliet Hall Exterior and Interior Doors

Current Photo After Revitalization

Many updates were being made to Van Vliet Hall which was built in 1926. Named after the founder of the school, it was deemed necessary to modernize the doors for usage. They also wanted to maintain the same look and feel to keep the tradition of the building intact. This project consisted of the following:

- Four styles of doors (Rectangular top, Half-round Top, Elliptical Top, Gothic Top)
- Door frames and trim included
- 2-1/4" thick doors
- Fabricated from Mahogany

Photo taken shortly after completion of Van Vliet Hall

The leaded glass (both clear glass in the entryway and stained glass in interior doors) was salvaged from the previous doors so the space allowed for the glass needed to be very accurate. Whether an interior or exterior door, all frames, trim, and mull covers were provided for installation.

This "famous" entry in Van Vliet Hall was in the "Field of Dreams" movie starring Kevin Costner. The ivy has since been trimmed, but the Gothic stone arch surrounding the entry double doors and imposing transom makes a great background in this scene. It definitely seems like the space you would find a writer gathering research or using the location for inspiration.

### Installation of Transom and Doors

The image to the far left is a piece of the crown mould. The image in the center is the newly-fabricated pieces for the trim around the interior of the door. Mahogany was used

for both its durability and weather-resistant properties; it both stains and paints well, adding to its versatility. To watch a **video** of the trim being cut on our CNC along with additional photos of the project, go to the project portfolio found on our website:

## Special Sizes and Shapes

We take careful measurements and prefer having a template to work from when we deal with custom shapes (doors or windows!). We create detailed shop drawings that provide all of the dimensions required for fabricating and installing. A template lets us double-check our measurements to help ensure a perfect fit.

Whether it is a half-round, radius (arched) top, or Gothic top, we have experience building it. From the drawing phase with our CAD drafter to the cutting and assembly with our skilled shop employees, we work to make it right the first time. Each project has its own unique challenges and there were so many different styles of door with this undertaking!

## Storm Doors for Your Summer Home Improvement Project

We offer many different styles to meet your budget and project needs ... including some stock doors available for immediate purchase!

Combination Storm and Screen Doors are used to provide additional protection to your entry door, add a way to create airflow in your home, and increase your home's visual appeal. A storm door can match your entry door or add a pop of color to set it off. To begin your journey, click this link:

### Your Next Step...Request a Quote

There are two ways you can request an estimate for a stock or custom storm door for a new project or to replace an existing storm door:

1. Use our request for quote form: [Storm Door Custom Quote Form](#)
2. Send an email with measurement information (width x height) and the type(s) of storm door you would like quoted to [info@adamsarch.com](mailto:info@adamsarch.com)

If you are an architect, contractor, or an owner of a historical building or home who is looking to renovate a property, we want to assist you with your architectural millwork needs.

We fabricate historically accurate:

windows  
window sash  
storm windows  
doors  
storm doors

Our capabilities include manufacturing custom millwork for homes and buildings across the United States. We can fabricate products that most large window and door companies will refuse.

Please give us a call at 1.888.285.8120 or visit our website at [www.adamsarch.com](http://www.adamsarch.com) and get your transformation started today.
