

Global Ministries Christian Church is a non-denominational Christian church located in Boston, Massachusetts. Originally designed by architect Arthur H. Vinal in 1889, this church has stood as a pillar of faith for individuals from all walks of life for many years. It was founded as Dorchester Temple Baptist Church in 1886, starting the foundation for a rich history of faith in the wider Boston area. When the time came to look at updating the design of this historic church, Adams Architectural Millwork took up the task of fabricating two new windows to replicate the historic feel while adding the longevity of a modern sash.

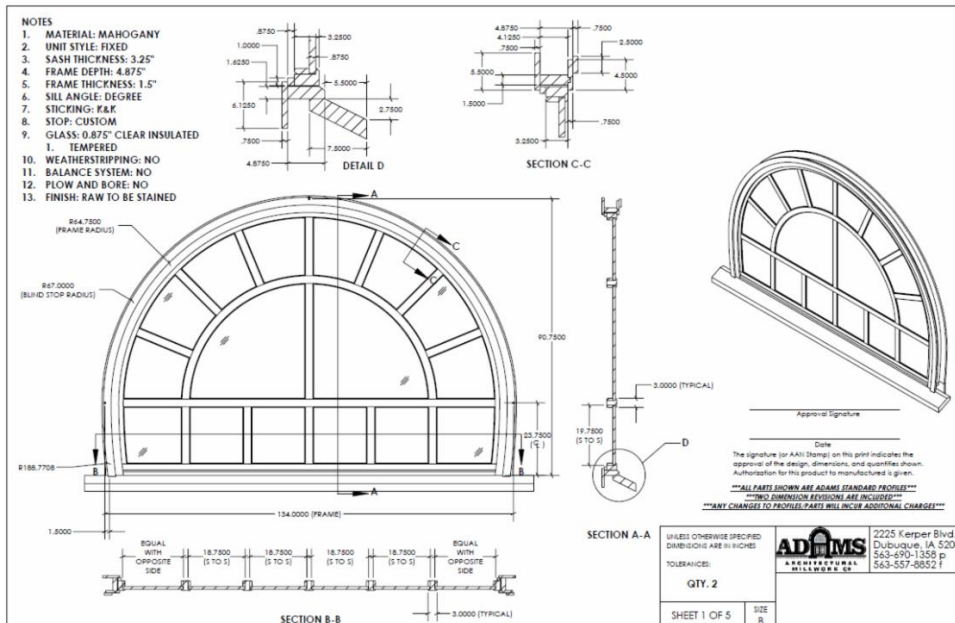

Original Design

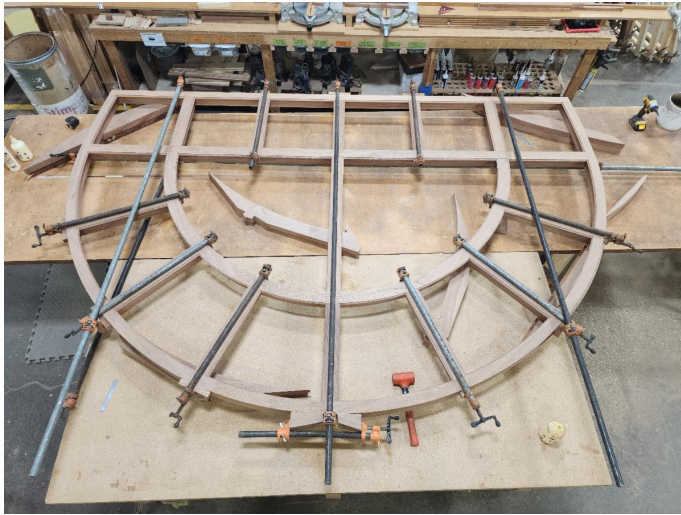

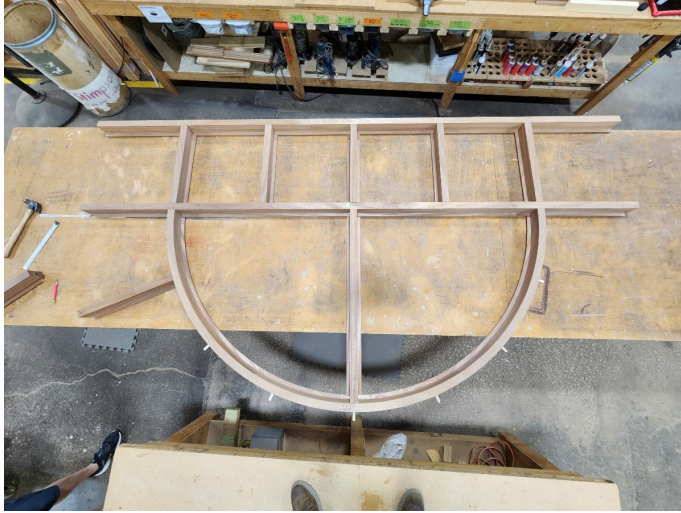

The original windows were half-round, but they did not give the same feeling as the circular arch of the doorway that is prominent in the design. The goal was to fabricate windows that more closely matched the entryway and fill the space better. This provides a more consistent feel across the front of the building, tying both the arches and the windows together in one stunning package.

Fabrication Process

Below are some images and a timelapse showing the fabrication of these two unique half-rounded windows. Each one was made using mahogany and features a total of 32 panes of glass, 16 in each sash. These windows measured 7 1/2 feet tall and a little over 11 feet wide, making it one of the largest projects to ever go through our shop.

When we begin the process of fabricating any project, creating approval drawings is our starting point. These drawings show the exact dimensions and details of the entire job as it will be made in our shop. The approval drawing provides the customer with an idea of what to expect while giving the shop a guide to making a concept come to life!

To find additional photos and information on this specific project, you can view the project profile in our portfolio here:

Storm Windows

Traditional Storm Window

Traditional Screen Window

Combination Storm/Screen

Our standard is to fabricate storm windows and storm doors from Northern White Pine, but we also use Mahogany for additional weatherability and durability. To retain the historic appeal of a home, a wood storm window is unmatched. We also offer modern comforts with styles that have inserts that can be changed from the interior of the house. The beauty of wood is in its versatility: you can stain a storm door to enhance the grain or paint to match your trim or house color.

Your Next Step...Request a Quote

There are three different ways you can request an estimate for a new or replacement storm window:

1. Use our custom quote form: [Storm Window Custom Quote Form](#)
2. Complete the [Storm Window Measurement Form](#) and email it to us
3. Send an email with measurement information (width x height) and the type(s) of storm window you would like quoted to info@adamsarch.com

Our capabilities include manufacturing custom millwork for homes and buildings across the United States. We can fabricate products that most large window and door companies will refuse.

Please give us a call at 1.888.285.8120 or visit our website at www.adamsarch.com and get your transformation started today.
